

Whitaker Bros Jumpmix Jnr

Optimal base nutrition for performance ponies

Perfect for:

- Performance ponies
- Hot types
- Ponies prone to weight gain
- Lazy types – simply combine with Key-3 Oil
- Pony club mounts

Key Points:

- Developed by leading nutritionists in partnership with champions John & Michael Whitaker
- The UK's only super-premium feed designed specifically for performance ponies
- Provides your pony with the energy needed to perform – without excitable behaviour
- Supports muscle growth and function for speed and power
- Replenishes muscle glycogen for quick recovery
- Simply add a plain chaff/chop and Key-3-Oil for a complete nutritional package
- Add Key-Plus by the cupful if extra conditioning is required

Created especially for the Performance Pony

Whitaker Bros Jumpmix Jnr is a scientifically formulated, fully balanced mid-low energy complementary feed for performance ponies. Using only the highest quality ingredients, Jumpmix Jnr is low in sugar, starch and high in fibre. Energy is delivered via cool energy pathways using ingredients including Stabilised Rice Bran. This delivers sustained release energy without associated excitable behaviour – essential for pony jumpers to perform sensibly at their best class after class. Jumpmix Jnr contains high levels of Protexin® for essential gut health and optimal feed utilisation.

Ingredients

Contains micronized grains (incl. Barley, wheat, maize, soya flake, Linseed), beetroot, steam extruded vegetable protein meals and stabilised Rice bran, alfalfa pellets, carrot, cold pressed rapeseed oil, vitamins and Chelated minerals, biomas and protexin® probiotics.

Analysis

Energy De (MJ/kg)	10.4 MJ/kg
Sugar	2.9
Protein	11.7
Oils	7.7
Fibre	17
Salt	1.1
Starch	17

Daily Feeding Guide

	Bodyweight	
	Pony	Horse
Jumpmix Jnr	250-350	400-600
Maintenance (Kg/Day)	1 – 1.5 kg	2 – 3 kg
Light Work (Kg/Day)	1.5 – 2 kg	3 – 4 kg
Moderate Work (Kg/Day)	2 – 2.5 kg	4 – 5 kg

Feed together with roughage (hay, chaff, chop, other forage or pasture). Where roughage is fed it should be offered at between 1 to 1.5% of bodyweight daily.

Fresh clean water must be made available at all times.

Daily feeding quantities above are a guide only.
