

Keyflow® Key-Plus

Steam Extruded Stabilised Rice Bran Concentrate

Keyflow
Redefining Equine Nutrition

Perfect for:

- Hard keepers / poor doers
- Hot types that require condition
- Yearling prep
- Horses prone to gastric ulcers
- Horses with gluten / feeding intolerances
- Performance horses for cool calories

Key Points:

- Easily add to the existing feed ration
- Allows you to 'top-up' your horse or pony's condition, topline, or energy as required
- Feeding stabilised rice bran builds quality muscle mass
- Fully steam extruded and gluten free formulation minimises digestive disturbances
- Highly digestible form of cool calories for energy that doesn't affect temperament
- Feeding rates start from as little as 250g per day

Fully Steam Extruded

Stabilised Rice Bran

Gluten Free

Low Sugar

Low Starch

Build and maintain superior topline and condition

Keyflow® Key-Plus is a concentrated feed additive for horses and ponies. This highly digestible conditioner can be added to any equine diet when increased condition, topline or an extra source of cool calories (energy) is required. To effectively condition a horse we recommend you feed a safe, highly digestible form of energy that doesn't affect temperament. Key-Plus achieves this by using the leading feed technology, wet steam extrusion, to greatly increase digestibility and nutrient absorption to over 90% in the small intestine. Combined with the high oil content this makes Key-Plus a highly effective conditioner and cool on-demand calorie source. Key-Plus contains added organic selenium, vitamin E and has a balanced calcium to phosphorous ratio.

Ingredients

Steam extruded stabilised rice bran concentrate, rice bran oil, mineral salts, molasses, heat stable vitamins.

Daily Feeding Guide

	Bodyweight	
Keyflow® Key-Plus	250-350 Pony	400-600 Horse
Top Dress for extra calories or condition (Kg/Day)	0.25 - 0.75 kg	0.5 - 1.5 kg

Feed together with roughage (hay, chaff, chop, other forage or pasture). Where roughage is fed it should be offered at between 1 to 1.5% of bodyweight daily.

Fresh clean water must be made available at all times.

Daily feeding quantities above are a guide only
