

Keyflow Nurture® Pro

Pre-digested Stud Balancer

Keyflow Nurture® Pro has been scientifically formulated by world class nutritionists as a nutrient dense ration designed to support and balance a pasture based diet for equine stud animals. Nurture® Pro has been pre-digested by way of steam extrusion to ensure maximum nutrient absorption is achieved in the small intestine. This highly palatable balancer is free from molasses so benefits from a very low sugar, as well as low starch content. With high levels of the long chain omega 3 fatty acid DHA, Nurture® Pro supports semen motility, mare postpartum recovery as well as foal development and early feeding behaviours. The included EQ-Amino Pack contains carefully balanced amino acids in a unique profile matched to that of equine soft tissue and bone supporting quality lean muscle and skeletal growth and development.

Nurture® Pro is formulated to be fed alongside a pasture based diet for stud animals but has also been designed to be included where required in any existing Keyflow® ration, to underpin and strengthen nutritive value.

Nurture® Pro is presented in larger steam extruded nuggets which are easy to pick up (even when dropped out in the field), chew and digest. Being pre-digested Nurture® Pro is ideally suited and highly sympathetic to the equine digestive system. Nurture® Pro is ideal for horses that are fed a pasture based diet and need a nutrient dense ration to balance pasture intake. It may also be fed to performance and sport horses as a high quality protein and nutrient rich addition to the diet.

Suitable for:

Dry mares | In-foal Mares | Lactating Mares | Foals | Weanlings | Yearlings | Yearling Prep | 2YOs | Stallions | Performance Horses | All horses that require musculature development and growth

| Ingredients | Analysis | | Feeding Guide | |
|---|------------|--------------|-----------------------------------|---------------------------|
| Pressure cooked and fully steam extruded protein meals, (inclu. hipsoy, rapeseed, pea), steam extruded cereal & omega 3 meals (inclu. linseed, rapeseed & wheat), cold pressed rapeseed oil (omega 3), heat stable vitamins & chelated minerals, vegetable source DHA (docosahexaenoic acid). | Est. DE | 13.5 MJ/kg | Dry mares | 150-200g per 100kg of b/w |
| | Starch | 12% | In-Foal Mares | |
| | Sugars. | 4% | Foals/Weanlings | |
| | Protein | 30% | Yearlings | |
| | Oil | 8.5% | 2YOs | |
| | Fibre | 8% | Stallions | |
| | Ash | 13.5% | Lactating mares | 100-250g per 100kg of b/w |
| | Copper | 217 mg/kg | Added to existing Keyflow Rations | 50-200g per 100kg of b/w |
| | Vit A | 60,000 IU/kg | | |
| | Vit D | 6000 IU/kg | | |
| Vit E | 1800 IU/kg | | | |

Introduce Nurture® Pro into the diet gradually over a minimum of 7 days, dietary changes should be made gradually. Total roughage offered should be between 1-2% of bodyweight daily. Fresh clean water must be made available at all times. Feeding quantities above are a guide only, Nurture® Pro should be fed as part of a balanced diet.
